

## **Speech Action Wizard**

This tutorial provides you the information needed to setup a speech action via the notification wizards.

To get to the starting point of this tutorial:

- Log in as administrator
- Click the "Notifications" tab

## 1. Adding a notification

a) First click on the "notification wizard"

🗿 System Name - Microsoft Internet Exp	lorer

c) Select speech action from the notification type options.

Notification	Picture Log	Setup	Applications	Hel
	Speech Action Wiza	ırd		
A stimu Manua				
Action Name	Speech 1			
Speaker Volume	○ 0 ○ 20 ⊙ 40 ○ 60 ○	90 🔿 400		
	Temperature Port 1 on port 0 is			
wessage	remperature Fort Tomport of	s now warning		
		~		
	Customize			
			Cancel	Next

Please choose a name for your **Sound** Action. Descriptive Action names increase the simplicity of the system.

Select the volume at which the Text to Speech module will read the message.

This is a preview of the message that will be said by the Text to Speech module. The message read will include the details relevant to your sensor.

Click **Customize** to edit the macro.

A macro is the piece of text that will return data from the securityProbe. For example \$[TIME] will take the time from the securityProbe and append it to the email.

The **Macro Description** button gives you details of the data the macro displays. At any point during editing of the macro you can click the preview button to see the changes you have made to the message.

Pressing the Test Speech over Speaker button, will cause the Speaker in the securityProbe to say the message aloud.
